

AIR PURIFICATION FOR INTERIORS

ACTIVE COATING

**UNIQUE TECHNOLOGY
AGAINST POLLUTANTS IN INTERIORS
WITH THE HELP OF PHOTOCATALYSIS THROUGH LIGHT AND OXYGEN**

Active Coating is a coating, which is equipped with the newest photocatalysis technology to minimize pollutants in indoor air and on surfaces.

IMPROVED AIR QUALITY VIA COATED SURFACES

Anyone exposed to ultra-fine dust, fine dust, germs, and pollen has an increased risk of secondary diseases such as asthma, bronchitis or even dementia, Alzheimer's disease, heart attack and cancer – scientists as well as doctors agree on that. However, microparticles settle in every household or public building and can only be fought against with new technology. ACTIVE COATING immensely improves the air quality of indoor spaces by using the innovative photocatalytic coating system of ACTIVE COATING.

AT A GLANCE

binds and breaks down allergens

binds and breaks down bacteria

binds and breaks down mold

binds and breaks down viruses

binds and breaks down fine and ultra-fine dust

No further costs such as filter change or maintenance work

Noiseless

Can be retrofitted at any time

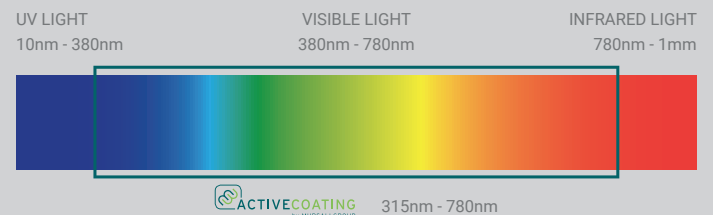

24H | 7D / WEEK | 365D / YEAR Permanent filtering

No energy costs

AIR PURIFICATION – WITH THE SHEER POWER OF LIGHT AND OXYGEN

After many years of research, our team was able to dope the semiconductors in such a way, that they not only work in UV range but also in visible light.

Both artificial and natural light animate the surfaces to break down pollutants.

Works in

sunlight

Works in

artificial light

Works in

day & night

THE PRODUCTS

PUR AIR

The product against ultra-fine dust, viruses, bacteria, and allergens for all glass surfaces is applied for you by a professional with a 30-year guarantee. **PUR AIR** permanently bonds with the glass surface and cannot be removed with any conventional cleaning agent.

PUR WALL

The product against ultra-fine dust, viruses, bacteria, and allergens for mineral surfaces like concrete, walls, and facades. Every craftsman and hobby craftsman can apply **PUR WALL** on the desired mineral surface themselves. Our product is colorless and easy to apply.
