

CERTIFICATE

for the antiviral properties of

PUR  **WALL**
coating

of the company

Mursall Active Coating GmbH
Löwensternstrasse 4
5411 Oberalm
Österreich

has been successfully tested versus
Bovines Corona Virus, BCoV (Stamm / strain: S379 Riems).

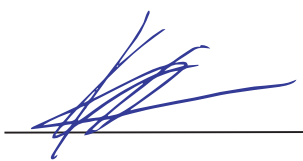

Virus reduction by more than 99%
according to ISO 21702 (modified)

In contrast to the standard method of the antiviral stress test on a covered and therefore permanently moist surface and an exposure time of 24 hours, **PUR**  **WALL** coating was tested at room temperature, under the influence of visible light, dry and within 1 hour.

The antiviral effect is clearly related to the photocatalytic effect
of the tested **PUR**  **WALL** coating.

For details, see Test Report No. B 27325 from HygGen Austria GMBH
